

Planning Commission

Agenda for the Thursday, May 17, 2018 Regular Meeting

Members of the Planning Commission

Woods Burnett
Chairman

Leonard Carter, Jr.
Timothy V. Key
Larry Watts

Bob Clark
JoAnn McKie
Briton Williams

CITIZEN ASSISTANCE: Individuals requiring special assistance or a sign interpreter to participate in the meeting are asked to please notify the Department of Planning and Development 48 hours prior to the meeting at 803-441-4221.

1. **Call to Order** – 7:00 p.m.
2. **Roll Call**
3. **Approval of Minutes** – March 15, 2018 Study Session and Regular Meeting
4. **Confirmation of Agenda**
5. **Application RZM18-001– Rezoning** – A request by the City of North Augusta to rezone ± 2.41 acres of land located at 1220 Georgia Avenue, Aiken County Tax Parcels: 007-07-06-003 and 007-07-06-004 from R-14, Large Lot, Single-Family Residential to P, Public Use. The purpose of the rezoning request is to convert the lot for use as a new fire station.
 - A. **Public Hearing**
 - B. **Consideration of Application RZM18-001 by Commission**
6. **Application PP18-001 – Major Subdivision Plan – The Retreat at Walnut Village** – A request by Charles Blackston for approval of plans for a townhouse development located near Walnut Lane and Northside Drive.
7. **Application PP18-002 – Major Subdivision Plan – Wando Woodlands, Section 6** – A request by Wando Partners, LP for approval of Section 6 of the Wando Woodlands Planned Development.
8. **Application SP18-002 – Preliminary Major Site Plan – River Falls Apartments** – A request by T. R. Reddy, I-20 Investors, LLC for approval of an apartment community located near Frontage Road and Martintown Road.

9. Staff Report

10. Adjourn

Planning Commission

Minutes of the Thursday, March 15, 2018 Study Session

Members of the Planning Commission

Woods Burnett

Chairman

Leonard Carter, Jr.

Bob Clark

Timothy V. Key

JoAnn McKie

Larry Watts

Briton Williams

1. **Call to Order** – The study session of March 15, 2018, having been duly publicized, was called to order by Chairman Woods Burnett at 6:00 p.m. Chairman Chip Burnett, Commissioners Bob Clark, JoAnn McKie, and Len Carter were present. Commissioner Tim Key arrived at 6:07 p.m. followed by Commissioner Briton Williams at 6:11 p.m. Commissioner Watts was absent. Also present were Michael Pace, Mountaineer Pest Control; Tom Zeaser, Director of Engineering and Public Works; members of the media and public.
2. **Discussion** –

Application RZT 18-001

Mr. Zeaser stated that the owner of Mountaineer Pest Control, located at 1518 Georgia Avenue, brought forward plans for a new building at 1516 and 1518 Georgia Avenue. A cursory review of the elevations brought to light compliance issues with the Neighborhood Preservation Overlay including a 2-story structure with parapet roof, front porch with shed roof, a roof slope incompatible with the surrounding neighborhood, setback requirements and percentage of window and door openings. The applicant later purchased 1514 Georgia Avenue with plans to expand the business onto that lot. The commissioners asked several questions about the current and proposed building design and if the design could come into compliance with the North Augusta Development Code. The staff and property owner addressed all questions.

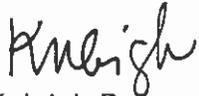

North Augusta Development Code §10.9.3 Residential Lot Landscaping, Foundation Planting

Commissioner McKie presented several residential landscape plans that demonstrate an issue with the landscaping requirements for lots of varying sizes. She pointed out that some smaller homes would need more landscaping than larger build outs per the NADC. She suggested designating a set number of plants per lot or a text amendment that would specify a new requirement for patio homes. Chairman Burnett expressed his concerns

with the feasibility of creating a new criteria that would be applicable to all lot specifications and suggested a request for a variance from the Board of Zoning Appeals for any properties that are unable to meet the current requirements might be appropriate.

3. **Adjourn** – With no objection, Chairman Burnett adjourned the meeting at 6:30 p.m.

Respectfully Submitted,

Kuleigh Baker, Secretary
Departments of Engineering and Planning and Development
Secretary to the Planning Commission

Planning Commission

Minutes of the Thursday, March 15, 2018 Regular Meeting

Members of the Planning Commission

Woods Burnett

Chairman

Leonard Carter, Jr.

Bob Clark

Timothy V. Key

JoAnn McKie

Larry Watts

Briton Williams

1. **Call to Order** – The regular meeting of March 15, 2018, having been duly publicized, was called to order by Chairman Woods Burnett at 7:00 p.m.
2. **Roll Call** – Members present were Chairman Burnett and Commissioners Len Carter, Bob Clark, Tim Key, JoAnn McKie and Briton Williams. Commissioner Watts was absent. Also in attendance were Tom Zeaser, Director of Engineering and Public Works; Kuleigh Baker, Engineering and Planning Secretary; Michael Pace, Director of Mountaineer Pest Services; and members of the press and public.
3. **Approval of Minutes** – The minutes from the Regular Meeting of January 18, 2018 were approved as transmitted.
4. **Confirmation of Agenda** – There were no changes to the agenda.
5. **Application RZT18-001– Text Amendment** –A request by Mountaineer Pest Services, represented by Michael W. Pace, Director, to amend Section 3.8.2 entitled "Establishment of Corridor Overlay Districts" in regard to NP, Neighborhood Preservation Overlay in Article 3, Zoning Districts, of the North Augusta Development Code.

Mr. Zeaser introduced the application from Mountaineer Pest Services, explaining that a cursory review of the conceptual building plans was non-conforming with multiple requirements of the Neighborhood Preservation overlay. Staff presented various options but without altering the original design, a text amendment would be the only way for the applicant to proceed.

A. Presentation by Applicant

Michael Pace, 128 Woodlawn Rd, Clarks Hill introduced himself as the Director of Mountaineer Pest Services and outlined a history of the business in North Augusta. His growing business requires additional space and he would prefer to build within the city versus renting. Mr. Pace gave several examples of issues with the Neighborhood

Preservation Overlay that would not allow for the construction of the proposed structure including: the inability to demolish homes within the overlay, the required 25' setback that would cut into the existing parking lot, and desiring a building footprint of 6,456 sq ft. Mr. Pace stated he would be able to comply with the base General Commercial zoning and noted the surrounding post office, auto repair shop, and other commercial business in the area that were not fitting with the residential zoning. Mr. Pace distributed a zoning map and preliminary elevations of the proposed structure to the Commissioners.

The Commissioners asked on clarification of the addresses and locations of the parcels owned by Mr. Pace. Mountaineer Pest Services would be expanded on the three lots beginning at the corner of Georgia Avenue and Briggs Avenue, 1514-1518 Georgia Avenue.

Chairman Burnett confirmed that Mr. Pace had not been before the Board of Zoning Appeals. He also mentioned the number of residential structures that exist on Georgia Avenue between Briggs and Maddox.

Commissioner McKie pointed out that the 2017 Comprehensive Plan emphasizes infill and parking in the back of the building to bring it closer to the street and sidewalk. She also quoted §3.8.6.1 of the NADC which says "continued reuse may not be feasible" within the Neighborhood Preservation overlay and that several buildings within the existing overlay needed to be demolished.

B. Public Hearing – Chairman Burnett opened the public hearing at 7:35 p.m.

Ken Powell, 320 Clay Street, expressed concern for the precedent this recommendation might create for the proposed public safety station. He was supportive of the Neighborhood Preservation overlay and said getting rid of a requirement to make a building fit would be taking a step backwards.

Dave Leverett, 121 Butler Avenue, praised the Neighborhood Preservation overlay's protection of the city's entryways. He believes the size of the proposed building would change to overall scale of the existing neighborhood and create an influx of activity not related to residential uses. He also pointed out that the auto repair shop, post office, and funeral home existed prior to modern zoning ordinances.

Hearing no additional comments from the public, staff, or applicant, the public hearing was closed at 7:40 p.m.

C. Consideration of Application RZT18-001 by Commission

Chairman Burnett asked for clarification on the zoning on the East side of Georgia Avenue. The Neighborhood Preservation overlay extends to Argyle Avenue on the East side of Georgia Avenue.

Commissioner Key expressed his desire to comply with the development code instead of changing the rules for an individual application. He prefers the applicant take the proper steps to reach a compromise with the design.

Commissioner McKie thinks the zoning should have been consistent on both sides of the street and that the area has struggled to grow because of the incompatible mix of residential and commercial development.

Commissioner Clark said he takes issue with changing the rules for one property owner because it is equivalent to spot zoning. The change in this instance is not a gradual shift from residential to commercial like the Neighborhood Preservation overlay calls for because the majority of the block is not currently used for commercial business.

Commissioner Carter stated that the General Commercial base zoning and Neighborhood Preservation overlay seemed to be contradictory.

Commissioner Williams made a motion to recommend for approval by City Council the request by Mountaineer Pest Services, represented by Michael W. Pace, Director, to amend Section 3.8.2 entitled "Establishment of Corridor Overlay Districts" in regard to NP, Neighborhood Preservation Overlay in Article 3, Zoning Districts, of the North Augusta Development Code with Commissioner McKie offering a second.

There was a brief discussion following the proposed motion. Commissioner Key said spot zoning may cause unintended consequences in future applications. Commissioner Williams said he did not want to cause a delay in the applicant's development plans. Chairman Burnett stated he felt that with Georgia Avenue being an arterial road, it matched the idea of the Neighborhood Preservation overlay exactly because it is an area in transition from residential that is being converted for commercial use.

Commissioners Carter, McKie, and Williams voted in favor of the motion with Commissioners Clark, Burnett, and Key opposed. The motion was lost with a 3-3 vote.

6. **Staff Reports** – Mr. Zeaser pointed out the Final Plat approval in February was for Gregory Landing, a 61 lot development off of Gregory Lake Road. Pending Applications include Walnut Village, an 86 townhouse development near Walnut Lane and Exit 5 that would utilize the access road at Hammond Place. Other projects include Culberson Orthodontics Minor Site Plan off Allen Court near the new North Augusta Pediatrics building and approval of a conversion of the old Waffle House on Old Edgefield Road to a Marco's Pizza.

7. **Adjourn** – With no objection, Chairman Burnett adjourned the meeting at 8:21 p.m.

Respectfully Submitted,

Kuleigh Baker, Secretary
Departments of Engineering and Planning and Development
Secretary to the Planning Commission

Project Staff Report

Rezoning – Map Amendment RZM18-001 Public Safety Station

May 10, 2018

Prepared by KB/TZ

Section 1 - Summary

Project Name	North Augusta Fire Station
Applicant	City of North Augusta
Address/Location	1220 Georgia Avenue
Parcel Number	Aiken County Tax Parcel 007-07-06-003, 007-07-06-004
Existing Zoning	R-14, Large Lot, Single-Family Residential
Proposed Zoning	P, Public Use
Proposed Use	Fire Station

Section 2 – Recommendation

Based on the finding of fact summarized below, the Department has determined the application is complete and that a recommendation by the Planning Commission to the City Council for this rezoning – map amendment, a request by the City of North Augusta, to rezone ± 2.41 acres of land located at 1120 Georgia Avenue and 1120 ½ Georgia Avenue, Aiken County Tax Parcels: 007-07-06-003 and 007-07-06-004 from R-14, Large Lot, Single-Family Residential to P, Public Use. The purpose of the rezoning request is to convert these parcels for use as a fire station.

Section 3 – History

The parcels for which rezoning is requested were purchased by the City of North Augusta in June 2016 from the Estate of Starkey Sharp Flythe, Jr. for construction of a Public Safety facility. Per the “*Building Assessment for North Augusta Public Safety Facility and Fire Station #1 Relocation*”, prepared by Johnson, Laschober & Associates, P.C., there exist two structures on the properties: the “Caretakers House” built in 1903 and the “Horse Stable House”, also building in 1903 and remodeled in 1970. The assessment describes these structures as former “support spaces” for the Palmetto Lodge, which stood on the adjacent parcel (also now owned by the City of North Augusta) before it was destroyed by fire in 2008. The assessment concludes that both structures are severely deteriorated due to the environment and vandalism and offer no significant history or relevance.

Section 4 – Site Conditions

	Existing Land Use	Future Land Use	Zoning
Subject Parcel	Residential	Mixed Use	GC, General Commercial and R-14, Large Lot, Single-Family Residential
North	Residential	Mixed Use	R-14, Large Lot, Single-Family Residential
South	Vacant	Mixed Use	OC, Office Commercial
East	Open Space Preservation	Mixed Use	P, Public Use
West	Residential	Low-Density Residential	R-14, Large Lot, Single-Family Residential

Access – The site currently has direct access to Georgia Avenue and Observatory Avenue.

Topography –The existing topography of the site is relatively flat, sloping slightly from the North West corner to the South East corner of the property.

Utilities – Potable water is available on Georgia Avenue through an existing 6-inch water main from the City of North Augusta. Adequate water capacity is available to serve the site. Sewer is available from the City of North Augusta and has adequate capacity to serve the site. Water and wastewater service are both available on Georgia Avenue and have adequate capacity to serve the site.

Floodplain – The subject property is not within federally designated floodplains or wetlands. There are no jurisdictional wetlands or state waters on the site.

Drainage Basin – The subject property drains into the Waterworks Basin. The Waterworks watershed includes high density residential, high density commercial, and some industrial areas. Stormwater Management has conducted a baseline assessment

of the basin streams and has rated the Waterworks Basin as fair. Several water quality impairments were found including ammonia and manganese.

Section 5 – Public Notice

A notice of the rezoning request and scheduled date of the Planning Commission public hearing was mailed to the owners of property within 200 feet of the subject property on May 1, 2018. The property was posted with the required public notice on May 2, 2018. A public notice of the rezoning request and scheduled date of the Planning Commission public hearing was published in *The Star* and on the City's website at www.northaugusta.net on May 2, 2018.

Section 6 – Findings and Analysis

Section 5.3.6 of the North Augusta Development Code (NADC) provides the minimum approval criteria to be used in determining a recommendation to City Council. The Planning Commission shall consider all of the factors specified in this section, at a minimum, in reviewing an application for a rezoning.

1. The size of the tract in question (§5.3.6.1).

The subject property is approximately 2.41 acres in total area, and is reflected as such on a boundary survey compiled for the City of North Augusta by John M. Bailey and Associates, P.C. dated April 11, 2016. The size of the property is appropriate for the purposes of the intended use of the property as a public safety headquarters. Rezoning the property to a P, Public Use district is appropriate for the purposes of redevelopment of this site.

2. Whether the proposal conforms with and furthers the goals of the Comprehensive Plan, other adopted plans, and the goals, objectives, and policies of the Development Code, §1.2 (§5.3.6.2).

The proposed rezoning would provide an opportunity for the development of a new public safety fire station for the City of North Augusta. The 2017 Comprehensive Plan has goals and objectives that encourage establishing a long-term plan for prioritizing public sector investments and efficient, high quality city services.

3. The relationship of the uses envisioned under the new zoning and the uses currently present in adjacent tracts. In particular, the Planning Commission shall consider whether as stated in §5.3.6.3 of the NADC:

- a. The proposed rezoning is compatible with the surrounding area;**

The proposed rezoning would provide a public safety fire station to be permitted by right. Access would be provided from existing roads in the transportation network. The existing R-14, Large Lot, Single-Family Residential zoning restricts the use for a fire station. It would appear that the proposed rezoning is compatible with the surrounding area.

b. There will be any adverse effects on the capacity or safety of the portion of street network influenced by the rezoning;

The street network must be evaluated as part of the site plan review process for any necessary upgrades to the existing transportation network.

c. There will be any adverse effects on existing or planned public utility services in the area;

The existing utility network appears to be able to accommodate the anticipated development potential of the subject property based on the sizes of the sanitary sewer line located near the site and availability of potable water and sanitary sewer from the City of North Augusta. As part of the site plan approval process, the existing utility systems will be reviewed to the extent necessary to ensure that development of the subject property is not creating any adverse effects on the overall utility service to the area.

d. Parking problems; or

The proposed rezoning will not impact or create any additional parking problems as the site is currently vacant. The site plan will be reviewed against the current Development Code parking standards for the proposed use, and at that appropriate time the amount of required parking will be determined.

e. Environmental impacts that the new use will generate such as excessive storm water runoff, water, air, or noise pollution, excessive nighttime lighting or other nuisances.

The proposed rezoning from does not appear to create any additional environmental impacts. The site plan must comply with all applicable development standards in the Development Code, including the state and federal standards associated with stormwater management, water and air pollution. City design standards are already in place to address excessive nighttime lighting.

4. Any recent change of character in the area due to installation of public facilities, other zone changes, new growth trends, deterioration and development (§5.3.6.4).

The proposed rezoning is appropriate to consider based on the existing land uses in the immediate area in order to facilitate development of large vacant tracts. Based on the site constraints of the subject property, the applicant does not currently have an opportunity to develop as a fire station.

5. The zoning districts and existing land uses of the surrounding properties (§5.3.6.5).

The proposed zoning classification of P, Public Use would allow for civic uses. The high density type of use anticipated for the subject property should not adversely impact the current viability of the surrounding area. A site plan will be required and must comply with all applicable development standards as specified in the Development Code.

6. Whether the subject property is suitable for the uses to which it has been restricted under the existing zoning classification (§5.3.6.6).

An analysis of the subject property by Johnson, Laschober, and Associates, P.C. has concluded that the subject property is suitable for the proposed public safety fire station.

7. Whether the rezoning is compatible with the adjacent neighborhood, especially residential neighborhood stability and character (§5.3.6.7).

The proposed rezoning does not appear to impact the compatibility of the adjacent uses. Appropriate buffers and screening must be provided as part of any site plan and should serve to mitigate any impacts and enhance the area. The rezoning will provide faster and better public services to not only Georgia Avenue but the surrounding area.

8. The length of time the subject property has remained vacant as zoned, if applicable (§5.3.6.8).

The subject property has not been occupied since 2013.

9. Whether there is an adequate supply of land available in the subject area and the surrounding community to accommodate the zoning and community needs including, but not limited to, affordable housing and economic development (§5.3.6.9).

The properties in the surrounding area are primarily large, residential lots with some commercial development located adjacent to the property. The primary zoning surrounding the property is within R-14, Large Lot, Single-Family Residential or OC, Office Commercial Zoning. There is an adequate supply of land

available in the subject area and the community to accommodate the needs of the community both in housing and in commercial redevelopment.

10. Whether the existing zoning was in error at the time of adoption (§5.3.6.10).

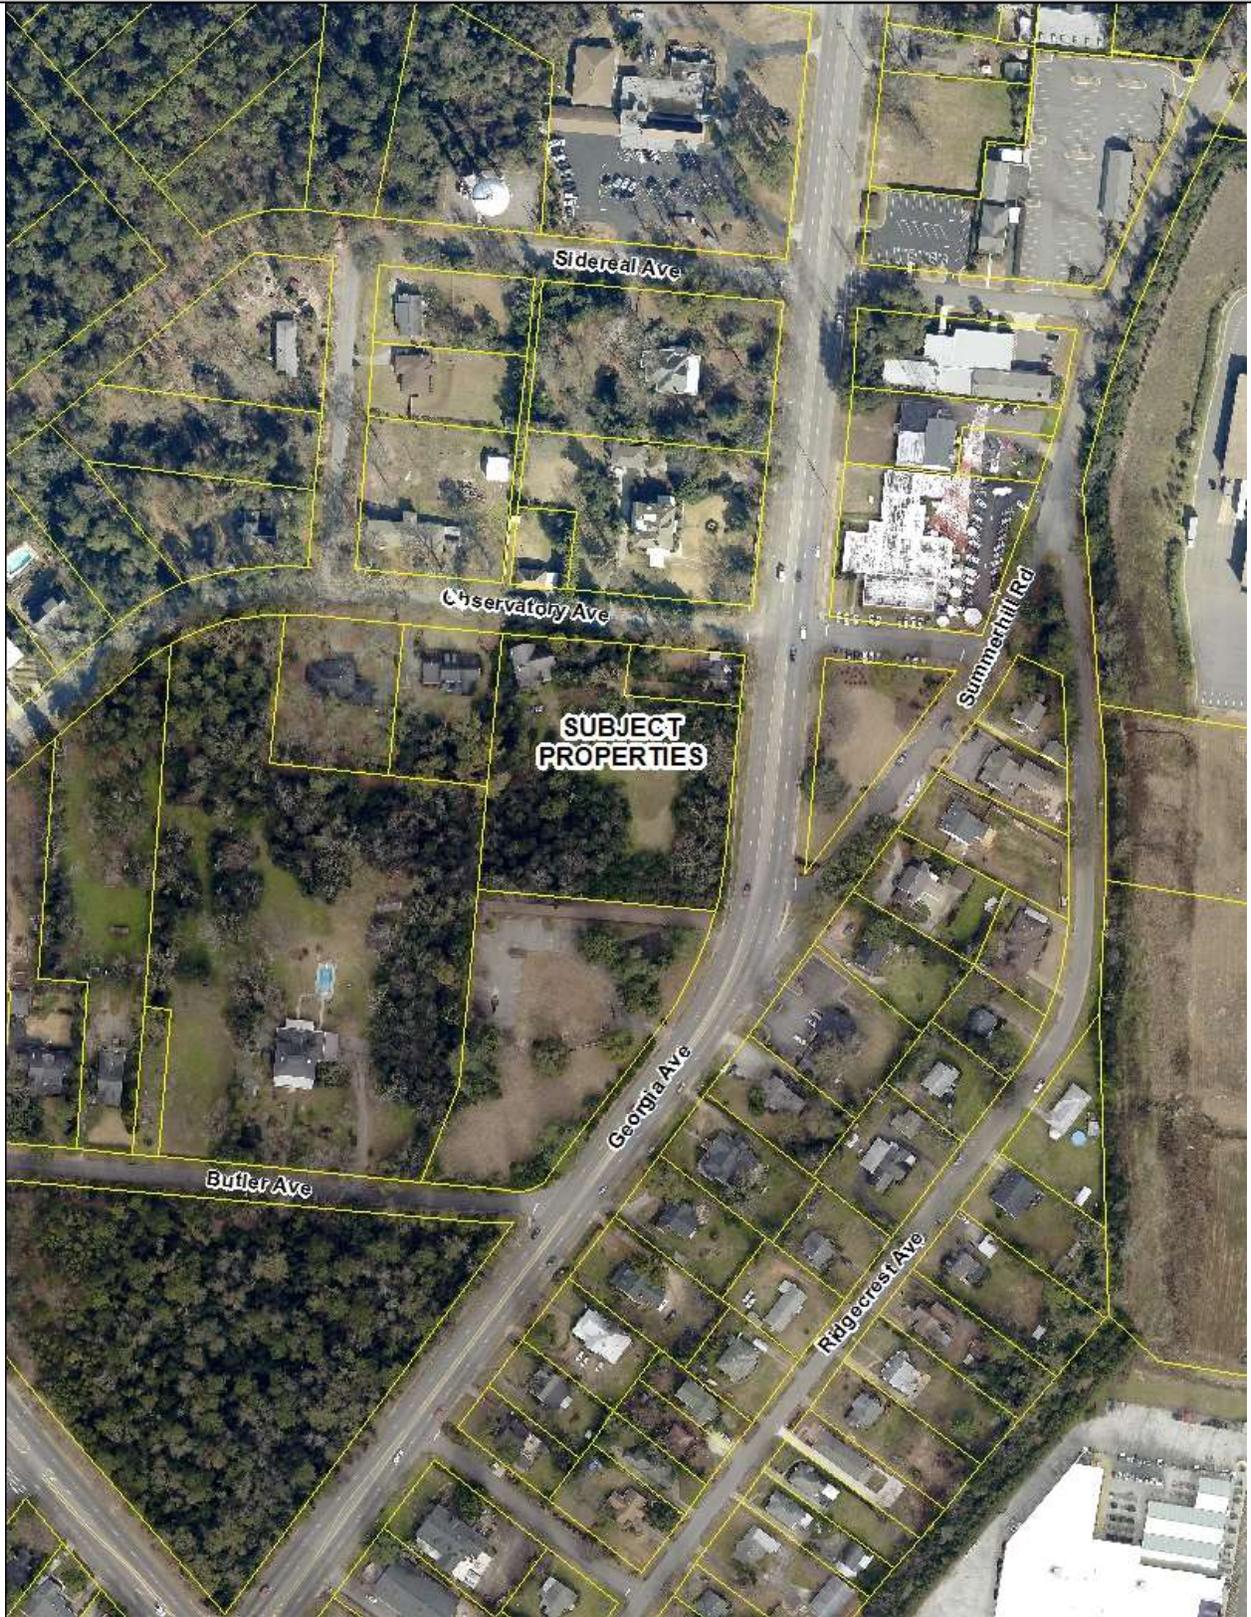

It does not appear that the existing zoning was made in error during the adoption of the zoning for the subject property.

RE: Proposed rezoning of \pm 2.41 acres of land located at 1220 Georgia Ave, Tax
Parcels: 007-07-06-003 and 007-07-06-004.

**Please note: Your property is not included in the rezoning application.
You are receiving this notice only because you own property within 200
feet of the proposed project area.**

Dear North Augusta Property Owner:

The City of North Augusta has made a request to rezone \pm 2.41 acres of land located at 1220 Georgia Avenue, Aiken County Tax Parcel Numbers: 007-07-06-003 and 007-07-06-004 from R-14, Large Lot, Single-Family Residential, to P, Public Use. The purpose of the rezoning request is to convert the lot for use as a new fire station.

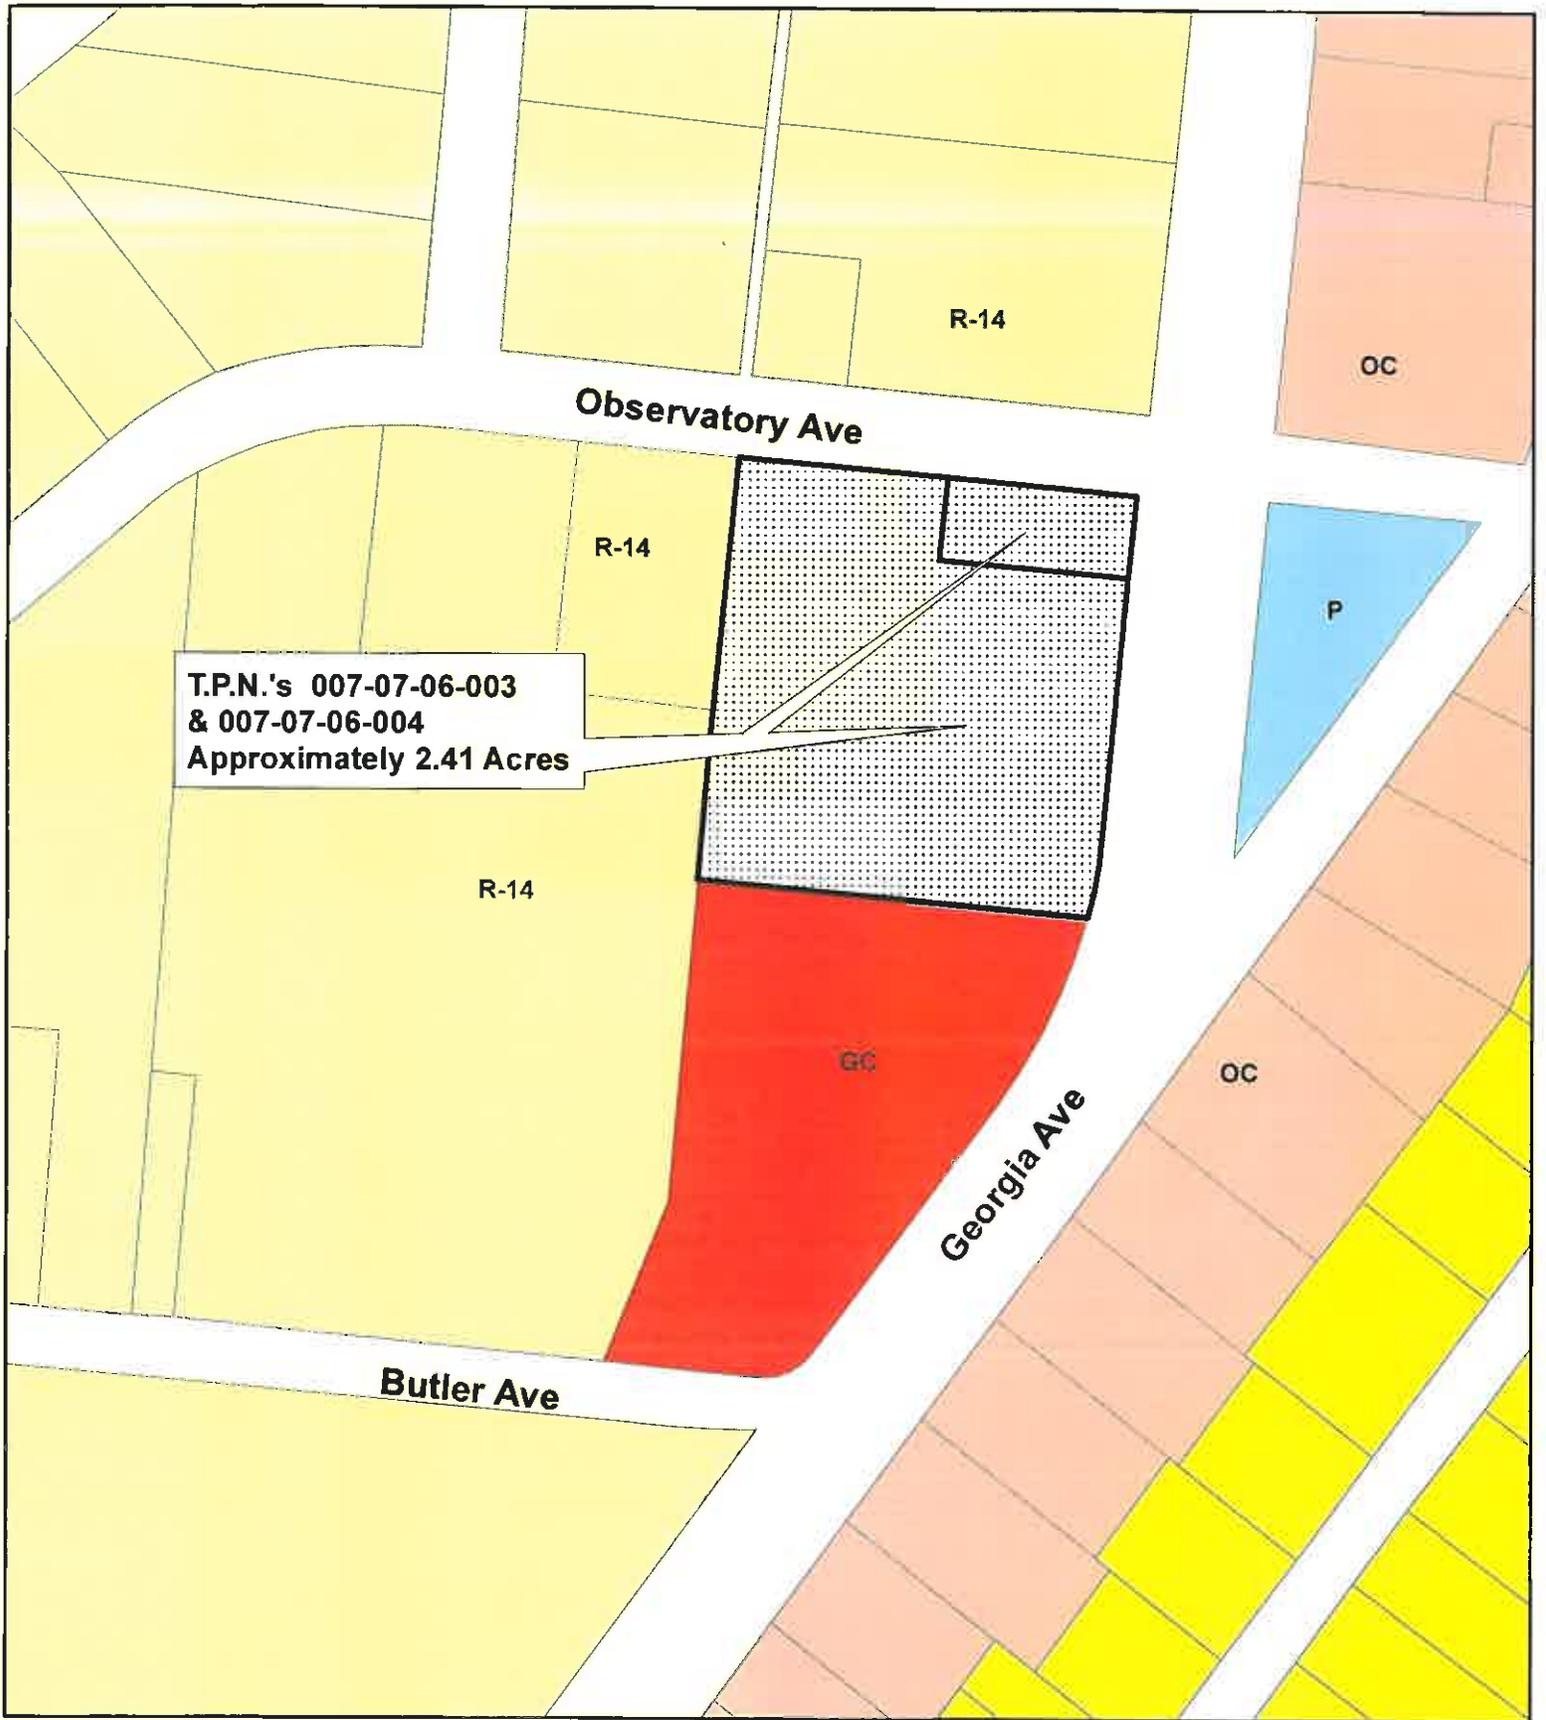

The North Augusta Planning Commission will hold a public hearing to collect public input and to consider the rezoning application on Thursday, May 17, 2018. Following the public hearing, the Planning Commission will prepare a recommendation for City Council consideration and action. The Planning Commission hearing will begin at 7:00 p.m. in the City Council Chambers on the third floor of the North Augusta Municipal Center, 100 Georgia Avenue. You are welcome to attend this public hearing.

A map of the project area is enclosed, along with a copy of the public hearing notice that will be published in *The Star* on May 2. If you have any questions about this application or need additional information, please contact the Department of Planning and Development at 803-441-4221.

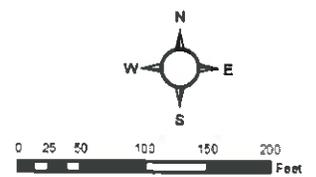

Sincerely,

Kuleigh Baker, Secretary
Department of Planning and Development

PUBLIC HEARING NOTICE

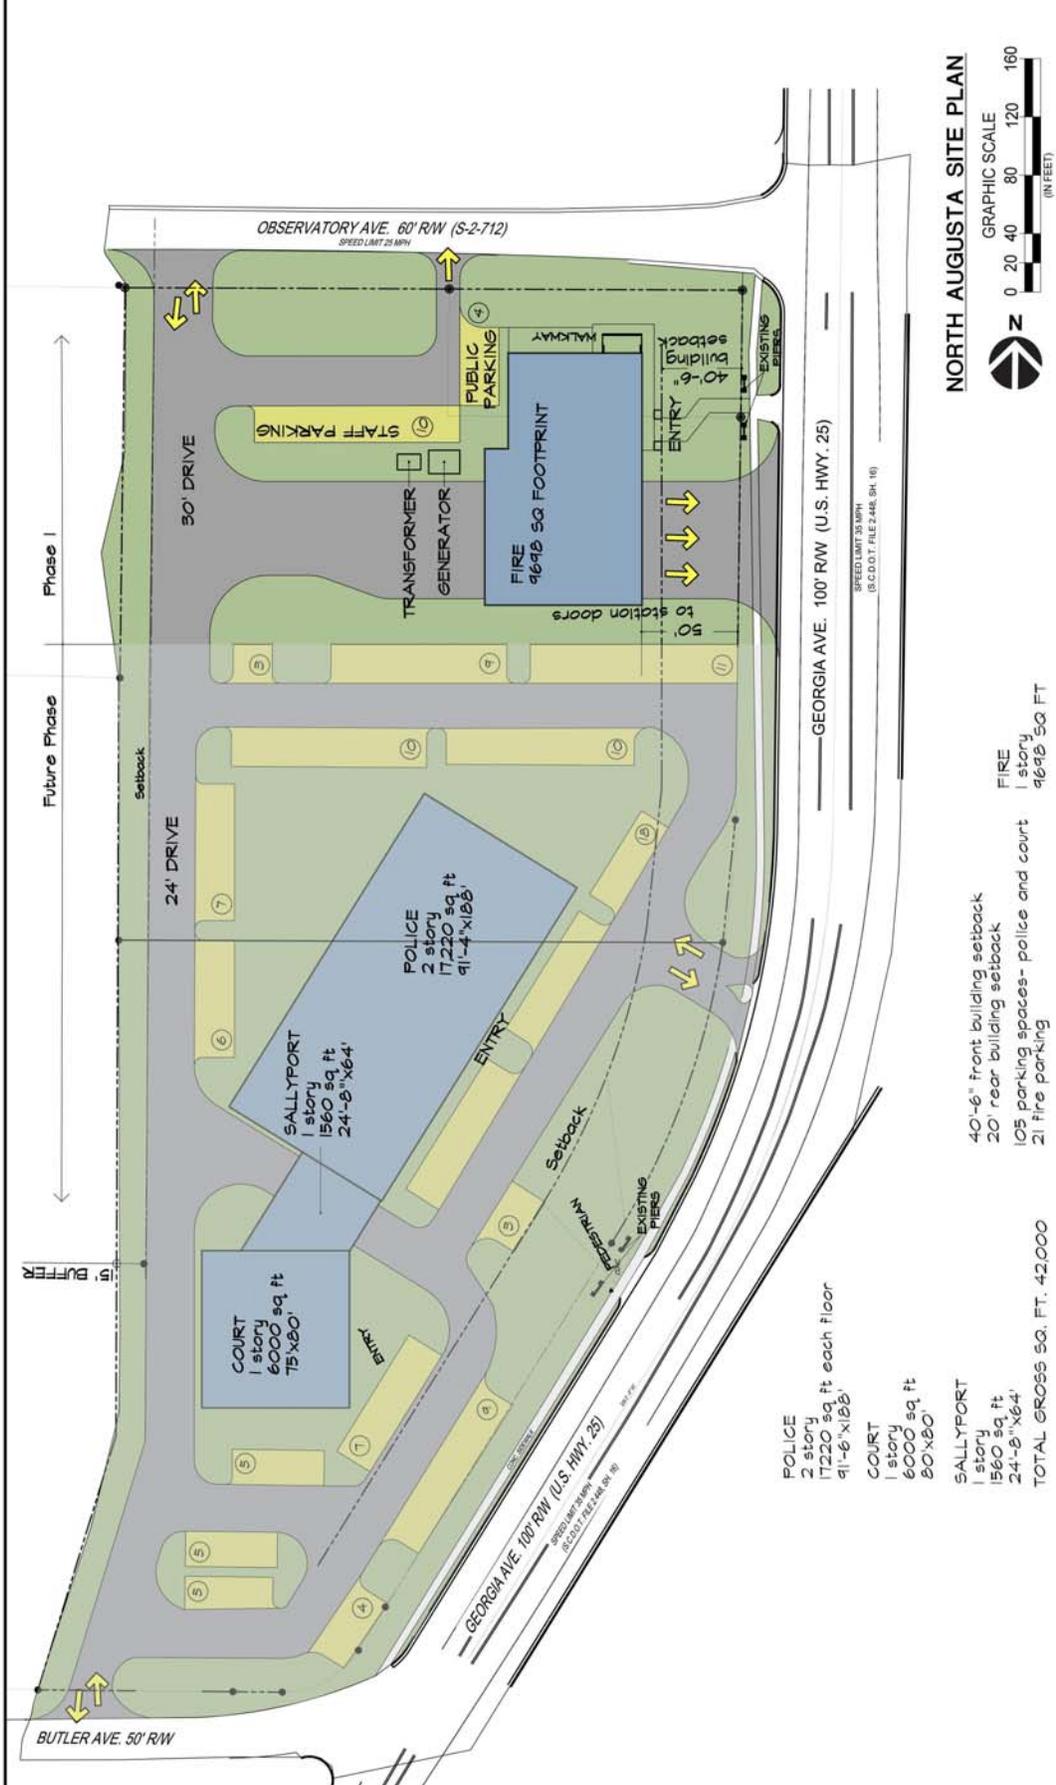

The North Augusta Planning Commission will hold a public hearing at its regular monthly meeting beginning at 7:00 PM on May 17, 2018, in the Council Chambers, North Augusta Municipal Center, 100 Georgia Avenue, North Augusta, South Carolina, to receive public input on the following application:

RZM 18-001 – A request by the City of North Augusta to rezone ± 2.41 acres of land located at 1220 Georgia Avenue, Aiken County Tax Parcels: 007-07-06-003 and 007-07-06-004 from R-14, Large Lot, Single-Family Residential to P, Public Use. The purpose of the rezoning request is to convert the lot for use as a new fire station.

A map and documents related to the rezoning application will be available for public inspection after May 10, 2018 in the Dept. of Planning and Development on the second floor of the North Augusta Municipal Center, 100 Georgia Avenue, North Augusta, South Carolina, 803-441-4221. Citizens and property owners interested in expressing a view on the requested rezoning are encouraged to attend.

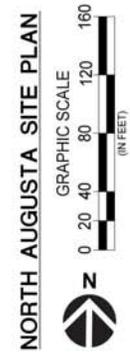

CITIZEN ASSISTANCE:

Individuals needing special assistance or a sign interpreter to participate in the meeting are asked to please notify the Department of Planning and Development at 803-441-4221 at least 48 hours prior to the meeting.

Department of Planning and Development

Project Staff Report

Major Subdivision (Preliminary Plat) PP18-001 The Retreat at Walnut Village

May 10, 2018
Prepared by KB/TZ

Section 1 – Summary

Project Name	The Retreat at Walnut Village
Applicant	Charles Blackston
Engineer	Civil Design Solutions, LLC
Address/Location	South of Walnut Lane
Parcel Number	010-14-04-007
Zoning District	GC, General Commercial
Future Land Use	Mixed Use
Proposed Use	Single Family Attached
Phase Size	±11.55 acres
Number of Lots	86
Open Space	2.31 acres (20% of total land area)
Gross Density	7.45 lots per acre

Section 2 – Staff Recommendation

Based on the findings of fact summarized below, the Planning Commission may consider the application of the major subdivision (preliminary plat) for a single-family attached dwelling development, known as The Retreat at Walnut Village, PP 18-001, subject to the conditions below. The final approval will not be given until there is substantial compliance with all relevant requirements of the proposed conditions identified below:

Conditions

1. Prior to approval of the major subdivision, the applicant shall revise the plan sets and supporting documents that provides all required technical information identified in the staff reviews.
2. Prior to approval of the grading permit, the applicant shall provide the asphalt pavement design detail and calculations based on existing soil conditions within the road rights of way and projected traffic volumes.
3. The existing temporary easement that extends into the proposed development from Cherry Laurel Drive will remain in place until such time as the roadway connection to Cherry Laurel Drive is completed and dedicated to the City of North Augusta.

Section 3 – Review and Approval Process

Section 5.8.3 of the NADC specifies the procedures for Planning Commission approval of major subdivisions (preliminary plats) that exceed threshold requirements of §5.8.3.1. An application is considered a major subdivision (preliminary plat) if; (a) the application does not meet the tests for a minor subdivision as set forth in §5.8.2.1; (b) the application is for property located in a PD District; (c) the application could otherwise be approved as a minor subdivision but a waiver is requested pursuant to §5.9; or (d) the application proposes development in two (2) or more phases.

The Department evaluates major subdivision (preliminary plat) applications for compliance with the NADC and the policies and objectives specified in the city's current comprehensive plan, currently the North Augusta 2017 Comprehensive Plan. If the major subdivision (preliminary plat) application is essentially complete and conforms to the provisions of the NADC and Comprehensive Plan, staff will schedule the application for consideration by the Planning Commission within sixty (60) days of the determination of completeness. The staff report will address compliance of the major subdivision (preliminary plat) with (a) the type of subdivision proposed; (b) the physical characteristics of the land; (c) the relation of the proposed development to surrounding areas and existing and probable future development; (d) the relationship to major roads, utilities and other facilities and services; (e) any proposed agreements, contracts, deed restrictions, sureties, dedications, contributions, guarantees, or other instruments, or the need for such instruments, or for amendments in those proposed; (f) compliance of the subdivision application with the provisions of the NADC; (g) and the suitability of plans proposed. The staff report will also include a recommendation for approval or denial and any recommended waivers, conditions of approval or modifications. A majority vote is required for the Planning Commission to approve, approve with conditions or waivers or both, if applicable, or deny a major subdivision (preliminary plat) application.

The approval of the major subdivision application constitutes approval of the subdivision development as to its character, intensity of development, general layout, and the approximate dimensions of streets, lots, and other planned features. Such approval binds the developer to the general scheme of the subdivision or land development and permits the developer to proceed with the installation of site improvements, subject to obtaining other necessary permits. The approval of the major subdivision application does not constitute approval of a final subdivision plat, and accordingly, does not authorize the sale of lots or the occupancy or use of a parcel of land. The applicant may request final approval for the whole, or a section, or sections of the major subdivision application upon completion of the subdivision and approval of the development by the City and state agencies with jurisdiction. Major subdivision application approvals shall expire two (2) years from the date of approval. The applicant may apply for and the Planning Commission may grant extensions for additional periods up to one (1) year each but not to exceed two (2) extensions.

This application was initially received on January 24, 2018. Several deficiencies in the application submittal were identified by initial staff reviews and will need to be corrected in the revised plan sets before final approval can be granted. Action by the Planning Commission is scheduled for the May 17, 2018 meeting.

Section 4 – Project Description

The applicant proposes to develop an eighty-six (86) single-family attached unit (townhomes) project. An existing detention pond is available to capture and treat the additional stormwater generated by the new development. Access to the proposed development will be provided from Walnut Lane. Internal sidewalks will be provided throughout the proposed development and the road network is expected to remain private with tie-ins to future development. A perimeter buffer of new vegetation will be required as the site is generally void of any significant tree stands. The proposed plans provide a large separation between the residential units and the adjacent residential/assisted living facility.

Section 5 – History

At its regularly scheduled meeting of August 17, 2017, the North Augusta Planning Commission reviewed a concept plan for Walnut Village. The Commission was generally satisfied with the proposed development showing a mixed use of town homes and commercial and hotel. The traffic patterns and associated traffic studies conducted at that time reflected a good understanding of the challenges and the Planning Commission encouraged efforts to develop a direct access off of Edgefield Road. The consensus was that the connection to Cherry Laurel Drive should not be opened initially; however, the right-of way for a latter connection should be preserved. Unless and until then the vegetative buffer should remain or be replaced as Northridge Drive is being constructed. This will allow, if ever needed, the future connection of Northridge Drive to Cherry Laurel Drive. There is an existing temporary easement attached to the end of Cherry Laurel Drive that encroaches upon some of the proposed lots. This easement will remain in place until such time as the roadway connection to Cherry Laurel Drive is completed and deeded to the City of North Augusta.

Section 6 – Site Conditions

	Existing Land Use	Future Land Use	Existing Zoning
Subject Parcel	Vacant	Mixed Use	GC, General Commercial
North	Single-Family	Low Density Residential	PD, Planned Development and R-14, Large Lot Single-Family Residential
South	Transportation (Austin Graybill Rd and I-20)	Transportation	-----
East	Commercial	Mixed Use	PD, Planned Development
West	Single-Family	Low Density Residential	R-7, Small Lot, Single-Family Residential

Access – The existing road serving this project is Walnut Lane. It is a city maintained roadway.

Topography – The site topography is relatively flat through the development area. There is no significant vegetation on the subject property.

Utilities – Water service to the development is proposed to be provided by Edgefield County Water and Sewer Authority via an extension from Arbor Place. Wastewater service is available from the City of North Augusta. An existing trunk line which lies within and along the eastern boundary of the proposed development has sufficient capacity to serve this site.

Floodplain – The property is located outside of any designated flood plain. There is no additional known environmentally sensitive area within this property.

Drainage Basin – This site is located within the Pole Branch Drainage Basin as designated on the City of North Augusta Stormwater Management’s Drainage Basin Map. The Stormwater Management Department has conducted an updated assessment of the basin and rates the overall quality as poor with water impairments found in the samples.

Section 7 – Public Notice

A notice of the major subdivision application and scheduled date of the Planning Commission meeting was posted on www.northaugusta.net on May 10, 2018.

Section 8 – Evaluation and Analysis

1. Single family attached dwellings (townhomes) are permitted within the GC, General Commercial zoning district.
2. The proposed major subdivision (preliminary plat) complies with the goals to provide a more varied housing stock to attract a more diverse population within the 2017 Comprehensive Plan.
3. The proposed major subdivision plan provides five (5) foot wide sidewalks in front of the proposed buildings/units. A public access easement is required to ensure that pedestrian access is provided.
4. The applicant must provide the number of required trees needed to satisfy the twenty (20) percent lot coverage for each residential lot as required in Section 10.9.2 of the NADC as part of the lot development stage (post final plat). Installation of the required trees will be at the time of the individual home construction and part of the Certificate of Occupancy inspection procedures.
5. Road widths are within the prescribed limits of local streets as identified in Table 14-2 of the NADC. The applicant will likely request the city to accept the infrastructure systems (sanitary and storm sewer systems) upon completion of the final plat process. The proposed road network complies with the applicable sections of the NADC.
6. The proposed plan is required to provide a minimum of one parking space for each single-family, attached dwelling unit as specified in Section 1.18 of Table 12-1, Parking Regulations by Use, in the NADC. Each lot is large enough to provide the minimum of two off-street parking spaces. Given the minimum required front setback of the district (15 feet), the layout of the structures will have to account for the depth needed to provide two nine by eighteen feet parking spaces. Additional guest parking should be made available throughout the development.
7. The proposed utility and infrastructure improvements have been reviewed and by the Director of Engineering and Public Works. Several outstanding requirements were identified in the initial plan review including. Revise notes/details accordingly; and remove/revise sewer notes on cover sheet that are not applicable/incorrect.
8. The applicant must receive an approved Stormwater Management Permit from our Stormwater Management Department prior to approval of the major subdivision. The Stormwater Management Plan has not been approved by the City's Stormwater Manager at this time.

Project # PP 18-001

May 2018

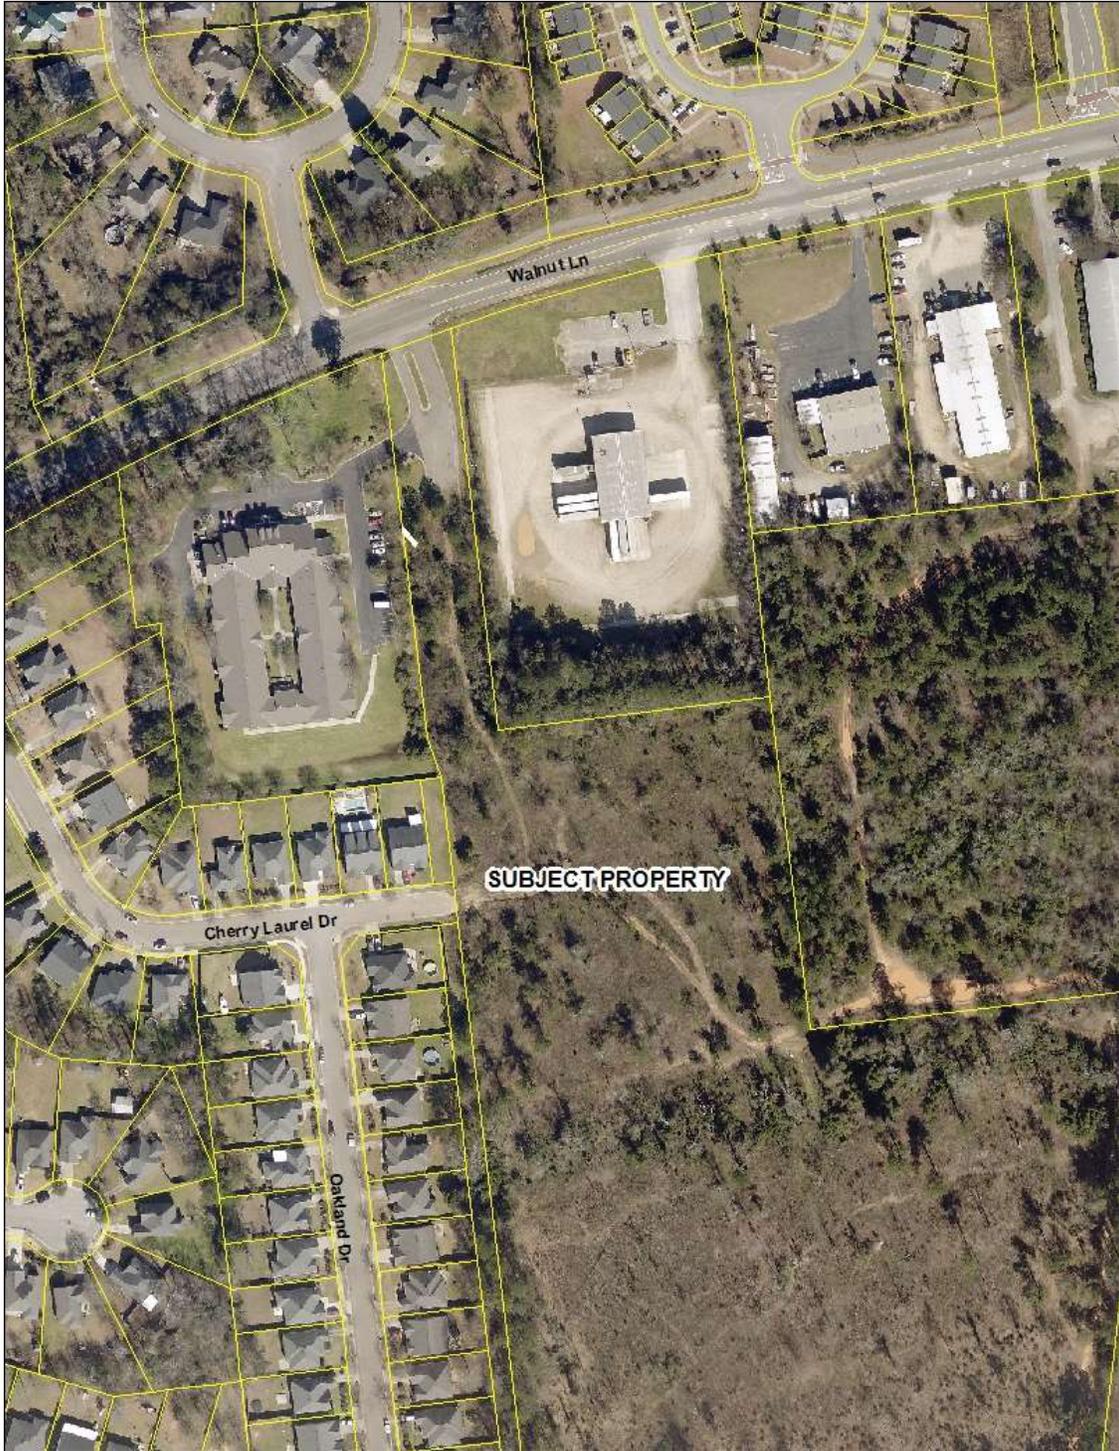

Page 6

9. Prior to construction of the road system, the applicant is required to provide soil testing results and final road pavement designs to be reviewed and approved by the City Engineer. The City Engineer permits soil testing and road pavement designs to be submitted after preliminary grading of the roads has been completed in order to allow the soil testing equipment to get into the site. This allows the developer the opportunity to properly research the soil conditions in the area of the proposed streets in order to provide a pavement design that will minimize future maintenance issues.

Project Staff Report

Major Subdivision (Preliminary Plat) PP18-002 Wando Woodlands Section 6

May 10, 2018
Prepared by KB/TZ

Section 1 – Summary

Project Name	Wando Woodlands, Section 6
Applicant	Wando Woodlands, LP
Engineer	Southern Partners, Inc.
Address/Location	Extension of Kurt Lane
Parcel Number	001-16-01-002 (portion)
Zoning District	PD, Planned Development
Future Land Use	Low Density Residential
Proposed Use	Single Family Detached
Phase Size	±12.84 acres, Section 6
Number of Lots	45 lots, Section 6
Gross Density	3.51 lots per acre, Section 6

Section 2 – Staff Recommendation

Based on the findings of fact summarized below, the Planning Commission may consider the application of the major subdivision (preliminary plat) for a single-family detached dwelling development, known as Wando Woodlands, Section 6, PP 18-002, subject to the conditions below. The final approval will not be given until there is substantial compliance with all relevant requirements of the proposed conditions identified below:

Conditions

1. Prior to approval of the major subdivision, the applicant shall revise the plan sets and supporting documents that provides all required technical information identified in the staff reviews.
2. Developer will show boundary of all lands proposed to be dedicated to the City of North Augusta with this phase.

Section 3 – Review and Approval Process

Section 5.8.3 of the NADC specifies the procedures for Planning Commission approval of major subdivisions (preliminary plats) that exceed threshold requirements of §5.8.3.1. An application is considered a major subdivision (preliminary plat) if; (a) the application does not meet the tests for a minor subdivision as set forth in §5.8.2.1; (b) the application is for property located in a PD District; (c) the application could otherwise be

approved as a minor subdivision but a waiver is requested pursuant to §5.9; or (d) the application proposes development in two (2) or more phases.

The Department evaluates major subdivision (preliminary plat) applications for compliance with the NADC and the policies and objectives specified in the city's current comprehensive plan, currently the North Augusta 2017 Comprehensive Plan. If the major subdivision (preliminary plat) application is essentially complete and conforms to the provisions of the NADC and Comprehensive Plan, staff will schedule the application for consideration by the Planning Commission within sixty (60) days of the determination of completeness. The staff report will address compliance of the major subdivision (preliminary plat) with (a) the type of subdivision proposed; (b) the physical characteristics of the land; (c) the relation of the proposed development to surrounding areas and existing and probable future development; (d) the relationship to major roads, utilities and other facilities and services; (e) any proposed agreements, contracts, deed restrictions, sureties, dedications, contributions, guarantees, or other instruments, or the need for such instruments, or for amendments in those proposed; (f) compliance of the subdivision application with the provisions of the NADC; (g) and the suitability of plans proposed. The staff report will also include a recommendation for approval or denial and any recommended waivers, conditions of approval or modifications. A majority vote is required for the Planning Commission to approve, approve with conditions or waivers or both, if applicable, or deny a major subdivision (preliminary plat) application.

The approval of the major subdivision application constitutes approval of the subdivision development as to its character, intensity of development, general layout, and the approximate dimensions of streets, lots, and other planned features. Such approval binds the developer to the general scheme of the subdivision or land development and permits the developer to proceed with the installation of site improvements, subject to obtaining other necessary permits. The approval of the major subdivision application does not constitute approval of a final subdivision plat, and accordingly, does not authorize the sale of lots or the occupancy or use of a parcel of land. The applicant may request final approval for the whole, or a section, or sections of the major subdivision application upon completion of the subdivision and approval of the development by the City and state agencies with jurisdiction. Major subdivision application approvals shall expire two (2) years from the date of approval. The applicant may apply for and the Planning Commission may grant extensions for additional periods up to one (1) year each but not to exceed two (2) extensions.

This application was initially received on March 16, 2018. Several deficiencies in the application submittal were identified by staff reviews and will need to be corrected in the revised plan sets before final approval can be granted. Action by the Planning Commission is scheduled for the May 17, 2018 meeting.

Section 4 – Project Description

The applicant proposes to develop the next section (Section 6) at this time. The phase proposes 45 single-family detached lots. A pond is planned in this section to capture and treat the additional stormwater generated by the new development before releasing the treated stormwater into the existing drainage way to the north. Access to the proposed sections will be provided through the extension of the existing road network within the Wando Woodlands subdivision. Section 6 does provide future road extensions to the remaining phases of the development. Some grading is proposed. Portions of the open space/common area are reserved for the future Greenway trail and a Greenway connector that will provide access through to these sections. The applicant is proposing to provide subdivision trees rather than street trees in this phase.

Section 5 – History

The area in the proposed Section 6 of the subdivision has been not been previously developed.

The subject property was part of a ±755 acre annexation, approved by City Council on November 3, 1986. The subject property was zoned Planned Development upon annexation as permitted by the 1977 Zoning Ordinance.

The Planning Commission conducted a public hearing for the general development plan on March 16, 2006 and recommended approval of the plan to City Council. The City Council approved the general development plan by Ordinance on April 17, 2006. The Section 1 major subdivision plan (preliminary plat) was approved by the Planning Commission at the May 18, 2006 meeting. The Section 1 final plat was approved on June 21, 2007.

The applicant sought approval for a minor modification to the approved general development plan at the March 2010 Planning Commission meeting. The purpose for the request was to revise the anticipated site grading and tree protection techniques for the development. No decision was made at that meeting. The Planning Commission approved the request for a minor modification at the April 2010 meeting with six conditions including those related to mass grading plans at the major subdivision stage, sidewalks within the development, street tree plans required at the major subdivision approval stage, and a minimum fifty foot wide dedication in areas of creeks and the final alignment of the Greenway through the development.

Section 2A was originally tabled by the Planning Commission at the July 15, 2010 meeting to address Commission members concerns of the proposed mass grading. Section 2A was approved by the Planning Commission at a special meeting on August 5, 2010. Construction of the infrastructure improvements and mass grading has commenced.

Section 2B was approved by the Planning Commission at the February 17, 2011 meeting for the major subdivision plan. The construction of the infrastructure improvements was completed and the developer received a final plat approval for Section 2B on November 27, 2012.

Sections 3 and 4 were approved by the Planning Commission at the December 20, 2012 meeting. A portion of Section 4 (10 lots) were approved for a final plat on October 6, 2014. These sections were approved for minor modifications on February 3, 2015.

A minor modification for the remaining sections of development within Wando Woodlands was considered at the June 18, 2015 meeting. The Planning Commission approved minor modifications revising the lot layout of the overall development, moving 18 lots from Phases 8 and 9 to Phases 5-7 and reduced the minimum lot width and overall sizes of lots within Phases 5-7 from 80 feet by 150 feet, generally, to 60 by 140 feet, generally.

City Council approved modifications to the Planned Development Ordinance on final reading at the August 3, 2015 meeting to include allowing the developer to select either planting street trees (within the road right of way) or subdivision trees (within the individual lot front yard) and removal of the required traffic impact fee of \$500 per lot.

Section 6 – Site Conditions

	Existing Land Use	Future Land Use	Existing Zoning
Subject Parcel	Vacant	Low Density Residential	PD, Planned Development
North	Vacant	Low Density Residential	R-14, Large Lot, Single-Family Residential
South	Single-Family	Low Density Residential	PD, Planned Development
East	Vacant	Low Density Residential	PD, Planned Development
West	Vacant/Apartments (Willow Wick)	Mixed Use/Low Density Residential	PD, Planned Development/R-5, Mixed Residential

Access – The local road network serving this phase of the Wando Woodlands development will be extended from Section 5. The roads ultimately serving this phase include Bergen Road and Langfuhr Way, which are state and city maintained respectively. There are no planned road improvements in the immediate future, however, there is anticipated to be a new collector road constructed between Bergen Road east of Bergen Place to Five Notch Road near the Gregory Lake Road intersection including adequate turn lanes and Greenway extensions and connectors

according to the Traffic Improvement Plan of the Augusta Regional Transportation Study Long Range Plan.

Topography – The site topography is rolling. There is a substantial amount of vegetation on the property. The proposed plans indicate a significant amount of the developable property within the lots will be clear-cut and mass graded.

Utilities – The Wando Woodlands property has an existing eight (8) inch water line and an eight (8) inch sanitary sewer line serving the site. Water is provided by Edgefield County Water and Sewer Authority. The water line proposed to be extended from Sections 5 into Section 6 is a six (6) inch main. The City of North Augusta has accepted the sanitary sewer and stormwater collection/detention systems and internal local roads in the previous section and anticipates the same for this section. The condition of Langfuhr Way and Bergen Road is satisfactory according to the Department of Engineering and Public Works.

Floodplain – The developable lots within this phase are not within federally designated floodplain or wetlands. There are environmentally sensitive areas within this project site. The applicant has provided a fifty (50) foot buffer over a small tributary to Pole Branch and has proposed to dedicate that property to the City as part of the final plat process.

Drainage Basin – This site is located within the Pole Branch Drainage Basin as designated on the City of North Augusta Stormwater Management's Drainage Basin Map. The Stormwater Management Department conducted a baseline assessment of the basin and rates the overall quality as poor. Water quality impairments found in the sampling included: nitrates, ammonia, phosphorus, iron, copper and zinc. There was channel degradation found throughout the basin.

Section 7 – Public Notice

A notice of the major subdivision application and scheduled date of the Planning Commission meeting was posted on www.northaugusta.net on May 10, 2018.

Section 8 – Evaluation and Analysis

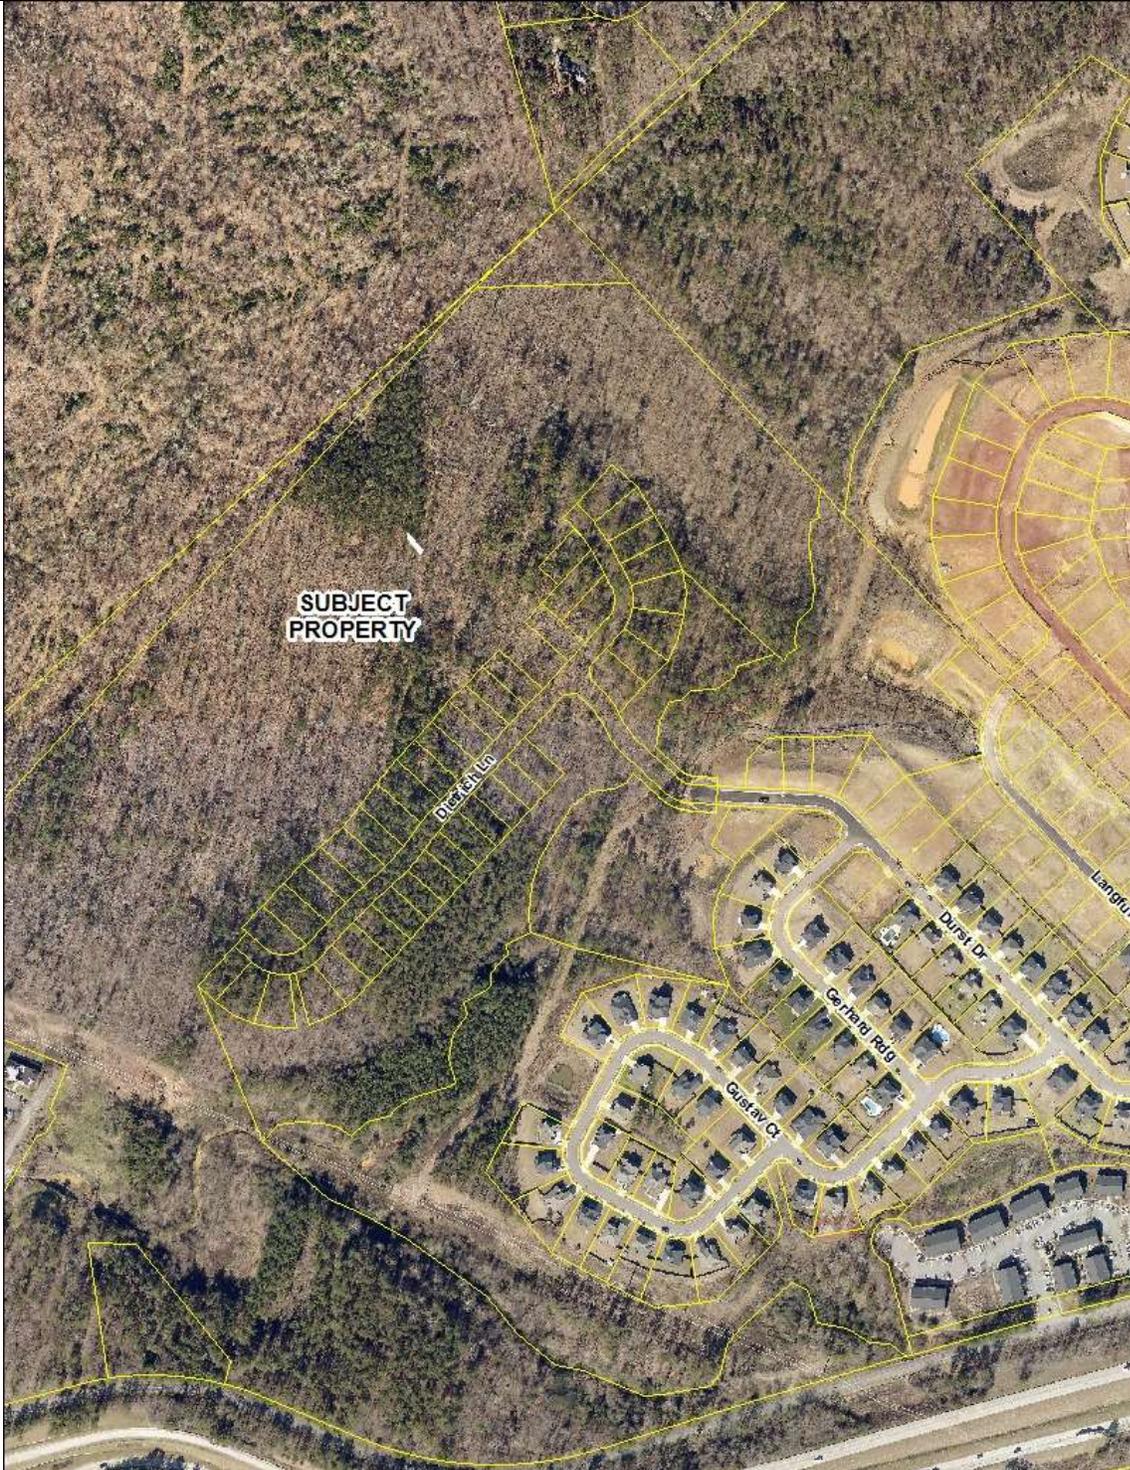

1. Single family detached dwellings are permitted within the Wando Woodlands Planned Development. Section 6 is consistent with the approved General Development Plan, as modified in 2015 by the Planning Commission and City Council, for the Wando Woodlands subdivision.
2. The proposed major subdivision plan provides five (5) foot wide sidewalks on both sides of the street, consistent with Section I.E.3 of the approved Wando Woodlands PD Ordinance and General Development Plan.

3. The proposed landscape plan for Section 6 satisfies the minimum plan requirements at this time. The applicant must provide the number of required trees needed to satisfy the twenty (20) percent lot coverage for each residential lot as required in Section 10.9.2 of the NADC as part of the lot development stage (post final plat). The lots are proposed to clear cut and have no, or limited, remaining tree canopy coverage. Installation of the required trees will be at the time of the individual home construction and part of the Certificate of Occupancy inspection procedures.
4. The proposed major subdivision provides internal vehicular and pedestrian circulation for this phase consistent with the approved general development plan. Anticipated trip generation for phases 1-7 of the planned development is approximately 2,532 trips per day. The Planned Development was approved prior to adoption of the NADC regulations that would require additional access points/locations as specified in Table 14-6 of the NADC. The recently modified Wando Woodlands Planned Development Ordinance (8-3-15) no longer requires a traffic mitigation payment of \$500 per lot at the time of final plat to provide funding for the City to construct additional exterior access in the future.
5. Road widths are within the prescribed limits of local streets as identified in Table 14-2 of the NADC. The applicant will likely request the city to accept the roads and applicable infrastructure systems (sanitary and storm sewer systems) upon completion of the final plat process. The proposed road network complies with the applicable sections of the NADC.
6. The proposed plan is required to provide a minimum of two parking spaces for each single-family, detached dwelling unit as specified in Section 1.18 of Table 12-1, Parking Regulations by Use, in the NADC. Each lot is large enough to provide the minimum of two off-street parking spaces.
7. The proposed Section 6 includes watercourses, floodplain areas, wetlands, and other environmentally sensitive areas identified and planned to be protected as part of these sections of the Wando Woodlands development. The applicant has indicated on the plans that he will dedicate the stream buffer, detention pond and possibly other open spaces in this phase.
8. The required open space for the entire Planned Development is approximately 32.7% of the entire site and exceeds the minimum twenty-five percent (25%) open space required for all Planned Developments as specified in Section 3.6.1.6.4 of the NADC.
9. The proposed utility and infrastructure improvements have been reviewed and by the Director of Engineering and Public Works. Some minor items require revision.

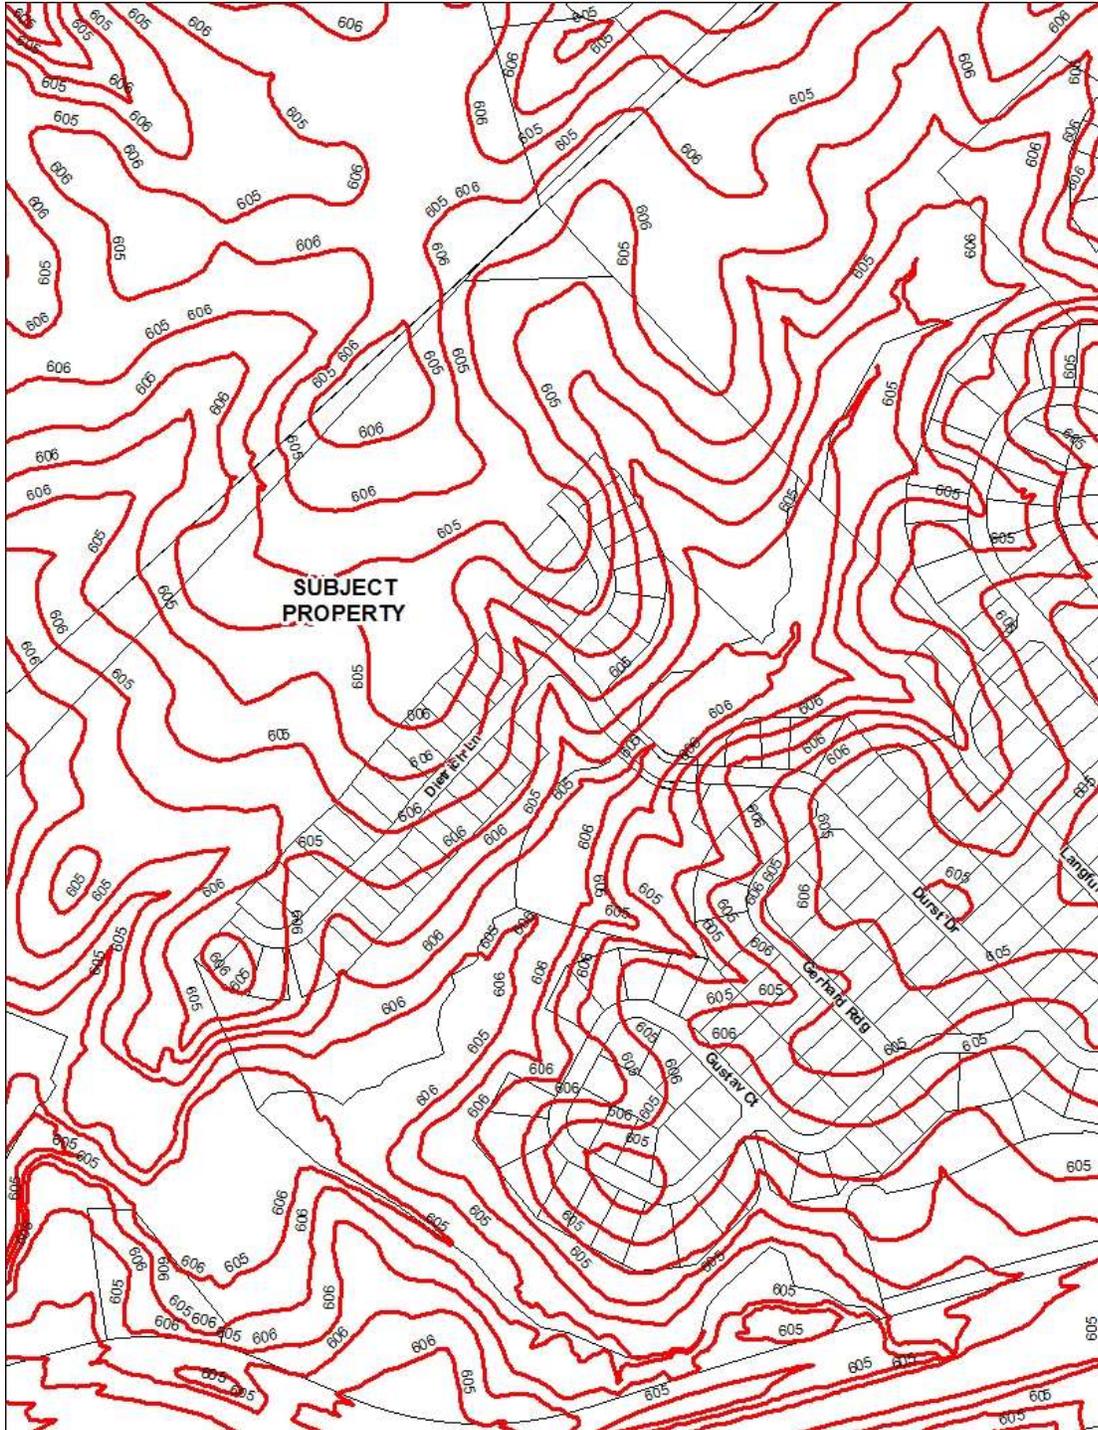

10. The applicant must receive an approved Stormwater Management Permit from our Stormwater Management Department prior to approval of the major subdivision. The Stormwater Management Plan has been reviewed and not yet approved by the City's Stormwater Manager. The applicant must satisfactorily address review comments and must identify the proposed modifications on the plans in response to the stormwater review comments.
11. Prior to the issuance of a grading permit, the city will designate dead and diseased trees within the proposed open spaces to be removed. The applicant will be responsible for removing the designated trees as part of the infrastructure improvements. Removal of the dead and diseased trees within the open spaces to be dedicated to the city will reduce the future maintenance impacts to the city and its budget.
12. Prior to construction of the road system, the applicant is required to provide soil testing results and final road pavement designs to be reviewed and approved by the City Engineer. The City Engineer permits soil testing and road pavement designs to be submitted after preliminary grading of the roads has been completed in order to allow the soil testing equipment to get into the site. This allows the developer the opportunity to properly research the soil conditions in the area of the proposed streets in order to provide a pavement design that will minimize future maintenance issues.

Preliminary Major Site Plan # SP 18-002

May 10, 2018

Prepared by KB/TZ

Section 1 – Summary

Project Name	River Falls Apartments
Applicant	T. R. Reddy, I-20 Investors, LLC
Engineer	ZEL Engineers
Address/Location	Frontage Road at Martintown Road
Parcel Numbers	001-20-02-006
Zoning District	R-5, Mixed Residential
Future Land Use	Mixed Use
Proposed Use	Multi-family Housing
Project Area	±16.06
Number of Units	±240 units

Section 2 – Planning Commission Consideration

The Department of Planning and Development has determined the above mentioned application complete and in compliance for a preliminary major site plan. The application is appropriate for Planning Commission review and approval. Final major site plan approval will be completed once the applicant has complied with all applicable development standards.

Section 3 – Review and Approval Process

Pursuant to §5.6.2 of the North Augusta Development Code, a major site plan (a single structure that exceeds 40,000 square feet, multiple structures that exceed 60,000 square feet or a site that exceeds ten acres) requires Planning Commission review. Approval can be in two steps. The first step is the submission of a preliminary site plan application and required information for review by staff and approval by the Planning Commission. The second step is the submission of a final site plan for review by staff for compliance with any conditions imposed by the Planning Commission and the technical site development provisions of the NADC.

The subject property in this application is 16.06 acres in area. The proposed development will include up to 240 multi family dwelling units developed in two phases. The first phase will include 13 buildings with 12 units for a total of 156 units. The second

phase will include 7 buildings with 12 units each for a total of 84 units. The project exceeds the minimum threshold for a major site plan and is proper for Planning Commission review and consideration.

Section 4 – History

The subject property was originally part of a Planned Development project for The Martin Group, LLC that would include self-storage units, a hotel, restaurants, retail outbuildings, and professional office buildings. The developer received a mine permit from SCDHEC in 2008 with multiple site, pond, and slope failures between 2008 and 2013. The SCDHEC mining permit was eventually terminated in 2013. The site was never developed as planned.

The property was sold in 2016 to I-20 Investors, LLC and rezoned from PD, Planned Development to R-5, Mixed Residential at the regular Planning Commission meeting of December 21, 2017 for use as an apartment complex.

Section 5 – Site Conditions

	<u>Existing Land Use</u>	<u>Future Land Use</u>	<u>Existing Zoning</u>
Subject Parcel	Vacant	Mixed Use	R-5, Mixed Residential
North	I-20	Transportation	Transportation
South	Vacant	Mixed Use	PD, Planned Development
East	Commercial/Vacant	Commercial	GC, General Commercial
West	Vacant	Mixed Use	PD, Planned Development

Access – The site is currently accessible from Frontage Road.

Per Section §14.5.1.1 of the NADC, a Traffic Impact Analysis (TIA) is required as part of any application for approval where the proposed development will generate at least fifty new peak-hour trips. Phase 1 of this development is estimated to generate approximately 97 peak-hour trips. A TIA has been requested and is required to be submitted with the full site plans.

Topography – The subject property is somewhat hilly within the developable portion of the site. The highest elevations are concentrated towards the center of the property and south end of the property.

Utilities – Water and wastewater service to the proposed development will be provided from existing utilities in Martintown Road. The existing ten (10) inch water main and twenty-one (21) inch sanitary sewer have sufficient capacity to serve this development.

Floodplain –The subject property is not located within a designated floodplain as identified on the FIRM maps.

Drainage Basin – This site is located within the Pole Branch Drainage Basin as designated on the City of North Augusta Stormwater Management’s Drainage Basin Map. The Stormwater Management Department has conducted an updated assessment of the basin and rates the overall quality as poor with water impairments found in the samples.

Section 6 – Analysis

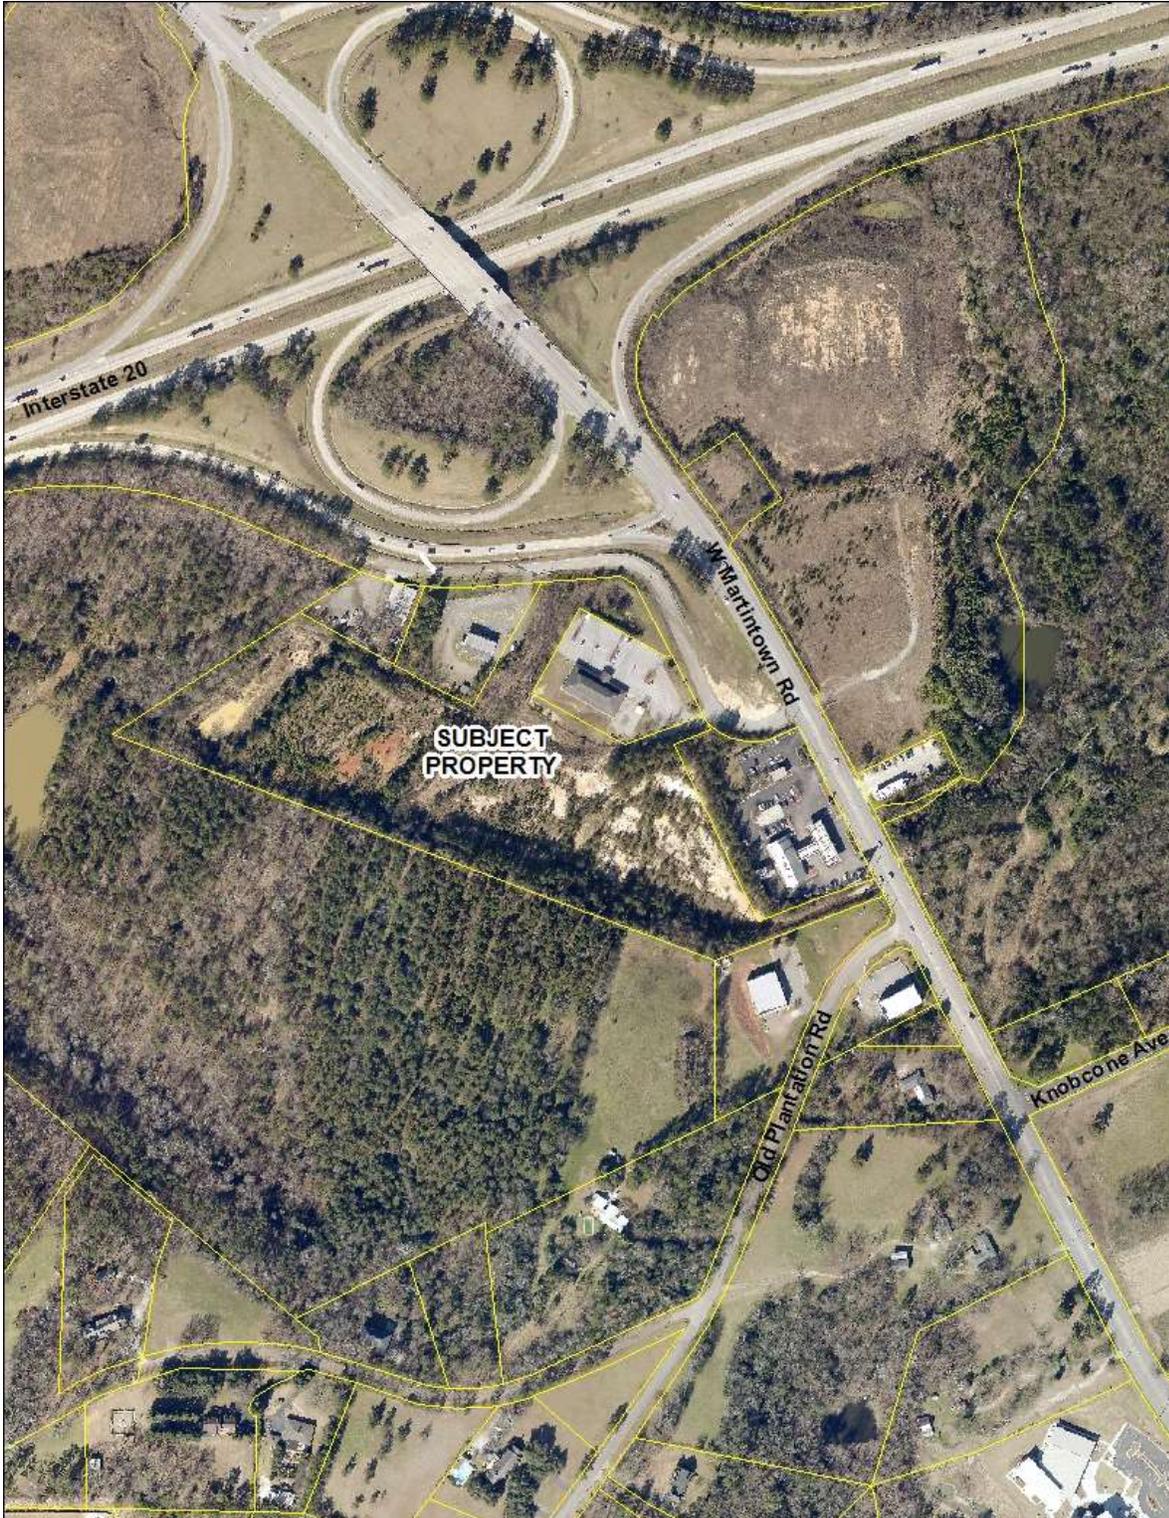

1. Multi-family residential uses are permitted within the R-5, Mixed Residential zoning district.
2. The future land use classification for the site is Mixed Use. The proposed use is appropriate for the future land use classification.
3. The site plan proposes access from Frontage Road. The current proposed access drive exceeds the expected trip generation of the multi-family use. A traffic impact study and mitigation will be required prior to final staff approval.
4. The maximum number of proposed multi-family units anticipated for this development is 240.
5. Parking calculations for the proposed multi-family development must be a minimum 1.5 parking spaces per unit. The developer has indicated through the site plans that parking will be designated in lots surrounding each apartment building. One guest parking spot per every 4 units is required. The total required parking for the development is 284 spaces.
6. The sample architectural elevations provided for the proposed detached multi-family units are included in the attached backup. The materials appear to be horizontal siding (unclear if vinyl or fiber/cementitious), wood accents and glass windows. The materials are appropriate for residential structures.
7. The final landscape plan must comply with the development standards for screening, buffering and street trees as specified in Article 10, Landscaping, in the

NADC. The final, detailed landscape plan will require details regarding the species and buffer points for the individual buffer areas to confirm compliance with the development standards.

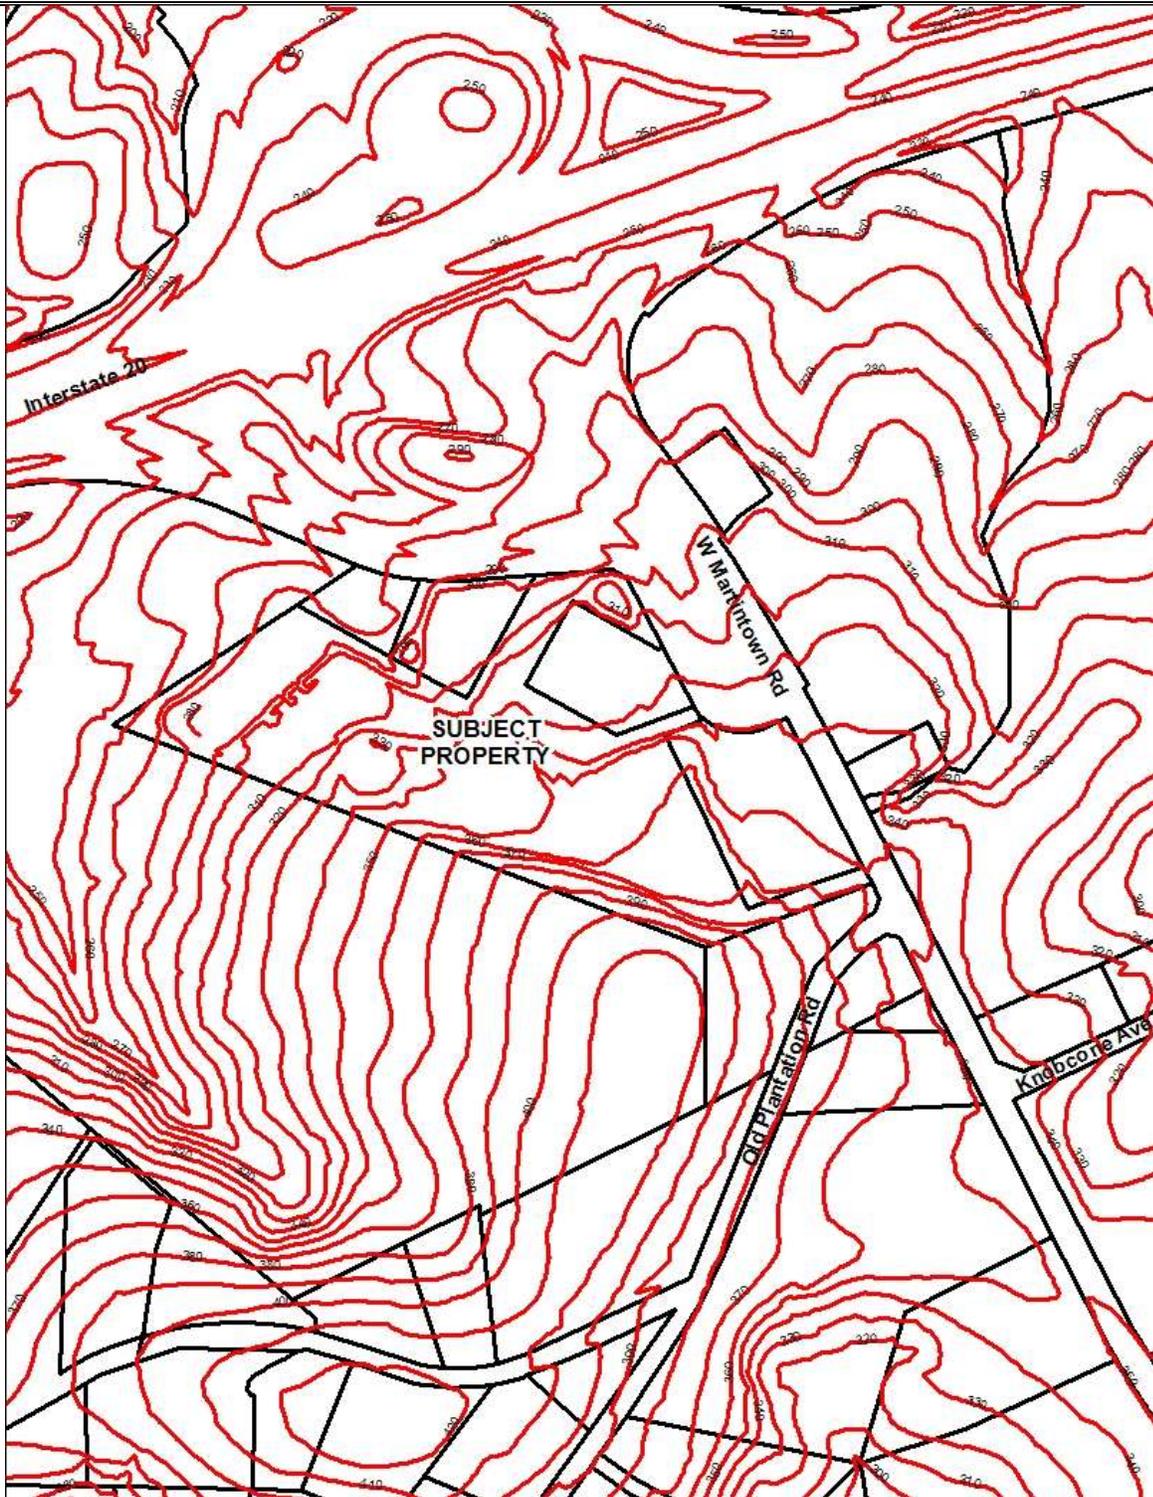

8. The proposed ingress and egress access drive locations are dependent upon the results of the Traffic Impact Analysis.
9. The Stormwater management department must approve the sediment and erosion control plans.
10. The applicant must satisfactorily resolve the discharge of the captured stormwater on the site and appropriately treat the storm water (water quality) on site as part of the final site plan.
11. All new lighting must comply with Section 7.4, Lighting, in the NADC as applicable. Final review and approve will be required as part of the final major site plan approval.
