

Planning RFP2019-001

**Addendum 1:**

The City of North Augusta has received the following questions and provides this response:

**1. Why is the project being re-advertised?**

North Augusta received only 1 bid previously and have re-advertised to ensure compliance with state and federal requirements.

**2. In the advertisement, it reads, "The City of North Augusta has recently been notified of plans to signalize the Bergen Road intersection and I-20 east bound at Exit 1." Is signalization at these two intersections final or still can change based on the results of this corridor study?**

This determination will be subject to the study. Most likely the light will stay as SCDOT has planned.

**3. In the advertisement, it reads, "All submittals shall contain the required information organized behind marked tabs". Does the consultant have the freedom to choose how to organize the proposal/tabs or should we plan on having 13 tabs separating all the Submittal Requirements?**

It would be best to follow the request of the RFP in order to facilitate review/ranking.
