

Study Area

ARTS 2050 MTP Update Open House

Wednesday, March 11, 4-7pm

North Augusta Community Center, 495 Brookside Ave., North Augusta

The Augusta Regional Transportation Study (ARTS) Metropolitan Planning Organization (MPO) is the local agency responsible for creating and administering long-range transportation plans in our area.

They are currently working on the required five-year update to the existing Metropolitan Transportation Plan (MTP). This plan is supposed to take a close look at current transportation needs in the area in order to prioritize funding for long-term transportation projects. These projects can include projects to improve, maintain and operate roads, bridges, public transportation, multi-use trails and sidewalks.

This meeting is being held to encourage residents to identify, review, and rank potential projects and funding priorities. The consultants will review the project progress up to now and explain the next steps in the study.

For more information on the plan and the process and additional meetings, please visit:
