

Addendum I:

Question I: “This RFP is titled ‘Request for Environmental Sampling’. However in the body of the proposal it states ‘The City of North Augusta - Stormwater Management Department is seeking quotes from qualified laboratories for the pick-up and analysis of its department environmental/stormwater samples...’ Will the City of North Augusta staff be doing the actual collection of samples and we will be responsible only for picking them up and returning to our lab for analysis?”

Answer I: The City of North Augusta will be responsible for all actual sample collection in the field. The qualified laboratory will be responsible for pick-up and analysis of the samples. If your laboratory is not in a pick-up radius, please include over-night shipping cost in the quote proposal.

Addendum II:

Question II: What are the season ranges for sampling?

Answer II: Winter is November to February, Spring is March to May, and Fall is September to October.
