

Magnolia grandiflora 'TMGH' PP#11612

Alta Magnolia

Category: Evergreen , broadleaf medium size flowering tree

Hardiness: Zone 6-9

Foliage: Glossy, medium sized dark green leaves with light brown underside; older leaves turn yellow – brown and shed in the fall and spring once new growth begins.

Bark: Smooth; grayish brown to blackish gray

Shape: Upright, dense, columnar

Mature Size: 20-25ft tall 8-10ft wide

Growth Rate: slow to moderate

Shade: Full Sun; tolerates part shade

Adaptability: Needs adequate soil moisture and fertility for optimum growth and aesthetics, adaptable to less desirable growing conditions; spreading root systems tend to make it difficult to preserve on construction sites.

Native Habitat: Eastern & Southern United states to Eastern Texas cultivar of nursery origin
