

## Quercus hemisphaerica 'Avalyn' Laurel Oak

This is the first clonal selection of Laurel Oak in production, thanks to noted nurseryman Dwayne Moon of Loganville, Georgia. Laurel Oaks are already a popular street tree in many southern cities and Avalyn™ Laurel Oak will open up new uses where predictable matching trees are desired. Avalyn™ Laurel Oak has vibrant dark green foliage (shaped like a willow oak leaf) and a nice habit of growth. Laurel Oaks don't grow old as gracefully as Quercus phellos, Willow Oak

**Category:** Medium shade tree; mostly evergreen

**Hardiness:** Zone 6-9

**Foliage:** Vibrant dark green, evergreen into February in the South, deciduous in Cincinnati

**Bark:** Essentially gray, smooth when young, later very shallow furrows

**Shape:** Rounded pyramidal

**Mature Size:** 50ft tall by 40ft wide

**Growth Rate:** Fast

**Shade:** Full Sun

**Adaptability:** Tough tree once established

**Native Habitat:** Native to primarily coastal Virginia south and west to Texas

**Uses:** Residential, urban, park, and street tree
