

Quercus x 'QRSW18' Streetwise Red Oak

Native shade tree - own root. Streetwise® is an own-root clonal oak selected by Dr. Michael Dirr from a large group of Crownright oak seedlings at Select Trees. "Like Crownright and unlike typical pin oak," Streetwise® has ascending branches, dense canopy, and clean leaf drop in the fall. Streetwise® is another natural hybrid and a vigorous choice to consider for tough urban settings

Category: Deciduous, broadleaf, large tree

Hardiness: Zone 6-9

Foliage: Bright Green, red-burgundy Fall color

Bark: Smooth grayish brown when young; matures dark gray to blackish brown; marked with horizontal light gray lines; develops shallow vertical fissures and rounded ridges

Shape: Uniform, dense, dominant leader

Mature Size: 30-60ft tall 20-40ft wide

Growth Rate: Fast

Shade: Full Sun

Adaptability: Good choice for urban area, tolerates air pollution, drought; holds up well in urban environments with low failure rate, roots can heave sidewalks

Native Habitat: From Eastern United States to coastal to Minnesota down through Arkansas and into Texas

Uses: Large parking lot island, large shade tree, specimen, lawn trees, median strips, naturalizing
